## MATHEMATICS PERFORMANCE EXPECTATIONS FOR ALL STUDENTS GRADES 6-10

## Identification of At-Risk Students:

Students are considered in need of additional support in mathematics if they are not meeting grade-level or course-level expectations in mathematics. An intervention plan must be developed and implemented for each student who is performing at a "Standards Not Met" level on the math portion of the SBAC. The intervention plan will specify:

1. which interventions the student will receive.
2. when progress monitoring will take place.
3. the roles and responsibilities of each stakeholder in the learning process.

Teachers should consider the following indicators when identifying students as at-risk:

- 2018 SBAC Mathematics performance level
- Data from the previous course or level
- Math Diagnostic Testing Project (MDTP) readiness test score
- Measures of Academic Progress (MAP) (expectations shown below)
- Math Inventory (MI) (expectations shown below)
- Classroom test and quiz data, Math Journals/Notebooks, exit slips, quick writes, projects, performance tasks
- Interim Assessment data
- Current grade in class
- Teacher observation of student performance
